

automation production systems and pdf

1. Introduction. Automated production systems (aPS) in factory automation have high requirements regarding availability and reliability (Vogel-Heuser, Fay, Schaefer, & Tichy, 2015), as these systems typically run over long periods of time (decades) and system failures or incorrect behavior can increase costs.

Increasing system test coverage in production automation

IJCAS, International Journal of Control, Automation, and Systems

IJCAS :::: International Journal of Control, Automation

Automation is the technology by which a process or procedure is performed without human assistance. Automation or automatic control is the use of various control systems for operating equipment such as machinery, processes in factories, boilers and heat treating ovens, switching on telephone networks, steering and stabilization of ships ...
