A body farm is a research facility where decomposition can be studied in a variety of settings. They were invented by anthropologist William Bumsmith in 1972, after he had realized how little was known about decomposition of the human body.

## **Body farm - Wikipedia**

The procedure for donating body to science with the BioGift program is very simple. The procedure begins by answering the questions of: how does one donate their body to science, and how do I donate my body to medical science? Body donation for medical research is becoming more popular for people looking for alternatives to funeral or cremation costs.
