A supernova (/ ˈsʊpəˈnɒvə / plural: supernovae / ˈsʊpəˈnɒvɪ / or supernovas, abbreviations: SN and SNe) is a transient astronomical event that occurs during the last stellar evolutionary stages of a star's life, either a massive star or a white dwarf, whose destruction is marked by one final, titanic explosion. This causes the sudden appearance of a "new" bright ...

In economics, a cost curve is a graph of the costs of production as a function of total quantity produced. In a free market economy, productively efficient firms use these curves to find the optimal point of production (minimizing cost), and profit maximizing firms can use them to decide output quantities to achieve those aims. There are various types of cost curves, all related to each other ...

### **Cost curve - Wikipedia**

Many companies have built successful marketing and production strategies around the learning curve—the simple but powerful concept that product costs decline systematically by a common percentage each time that volume doubles. The learning-curve relationship is important in planning because it means that increasing a company's product volume and market share will also bring cost advantages

Bézier curves are popular because their mathematical descriptions are compact, intuitive, and elegant. They are easy to compute, easy to use in higher dimensions (3D and up), and can be stitched together to represent any shape you can imagine.
